

## **Supply Chain Module**

The Supply Chain module commenced with a workshop with other members of the Sustainability Advantage Hunter Region Aged Care Cluster and was followed up with our staff meeting/communicating with a consultant. The focus was on reviewing how we engage with our suppliers and customers/clients. We then explored options to reduce risk and cost and get the best environmental results from products and services.

As a result of this module, Mercy Services:

- Reviewed and updated the Payments & Purchasing Policy;
- Utilise electronic payment of accounts as our default method; and
- Utilise email to send accounts wherever possible.
